

# Periodontal

**Product Name :**Periodontal Antibacterial Gel

**Product Specifications:** 0.5g/branch

**Product Characteristics:** Slow-release formulations in periodontal pocket

**Scope of Use:** Used for antibacterial of periodontal mucosa

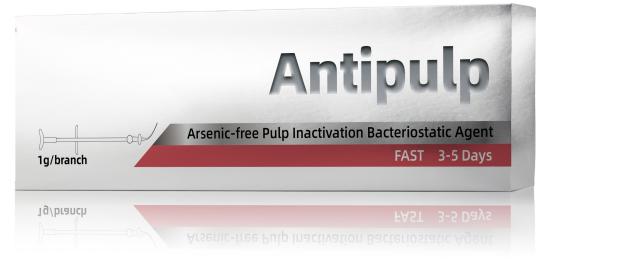

# Antipulp(fast)

**Product Name :**Arsenic-free Pulp Inactivation Bacteriostatic Agent (Fast)

**Product Specifications :** 1g/branch

**Product Characteristics:** Pulp inactivation prior to pulpotomy or curettage:After dead pulp extraction of residual pulp inactivation. Safe and painless inactivation of pulp in 3-5 days.No side effects, suitable for permanent teeth

**Scope of Use:** Used as an antimicrobial for the oral cavity

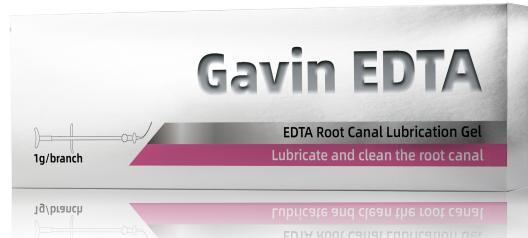

# Gavin EDTA

**Product Name :**EDTA Root Canal Lubrication Gel

**Product Specifications:** 1g/branch

**Product Characteristics:** It softens root canals, protects instruments and has a lubricating effect

**Scope of Use:** For lubrication and cleaning of root canals during root canal preparation and enlargement

# Antipulp(Slow)

**Product Name :**Arsenic-free Pulp Inactivation Bacteriostatic Agent (Slow)

**Product Specifications:** 1g/branch

**Product Characteristics:** Pulp inactivation prior to pulpotomy or curettage:After dead pulp extraction of residual pulp inactivation. Safe and painless, 10-14 days for pulp deactivation, no side effects, for both deciduous teeth and permanent teeth.No side effects, suitable for both deciduous teeth and permanent teeth

**Scope of Use:** Used as an antimicrobial for the oral cavity

**Gavin is *SAFE***  
**Secure Advanced Flexible Efficient**

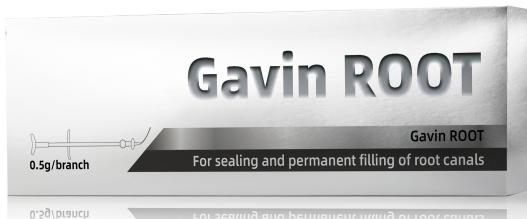

# Gavin ROOT

**Product Name :** Gavin ROOT

**Product Specifications:** 0.5g/branch

**Product Characteristics:** Good sealing effect with strong biocompatibility, inhibits inflammation reduces postoperative pain and can accelerate apical healing

**Scope of Use:** For sealing and permanent filling of root canals

# Gavin MTA

**Product Name :** Gavin MTA

**Product Specifications:** Powder: 1g/bottle

Liquid: 2.5ml/bottle

**Product Characteristics:** Better biocompatibility, non-cytotoxic, prevents bacterial microleakage, not affected by humid environment

**Scope of Use:** For sealing and permanent filling of root canals

# Iodoform PexTM

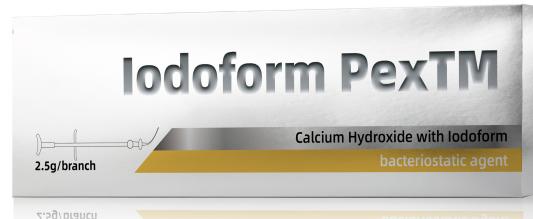

**Product Name :** Calcium Hydroxide with Iodoform

bacteriostatic agent

**Product Specifications:** 2.5g/branch

**Product Characteristics:** Injectable packaging, easy to operate. Rapid reaction, stable properties

**Scope of Use:** Bacteriostatic for the oral cavity, etc

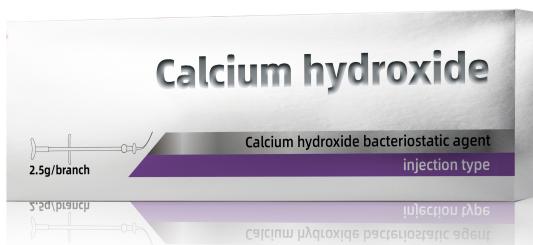

# Calcium hydroxide

**Product Name :** Calcium hydroxide bacteriostatic agent (injection type)

**Product Specifications:** 2.5g/branch

**Product Characteristics:** Currently the first choice for temporary sealing and sterilization of root canals

**Scope of Use:** Bacteriostatic for the oral cavity, etc
